Owner - C\ F Galluzo

TO WHOM IT MAY CONCERN

This is to certify that on the 22nd February, 2010 at the request of Mr F Galluzo I examined this filly at Raby, NSW.

The horse was in good general health and condition with normal cardinal signs. There were no abnormalities on digital palpation of the joints, tendons and musculature. There was no pain response on hoof testers. The horse was free of lameness and ataxia when examined at the trot on a lead and when trotting off after flexion tests. Auscultation of the chest was within normal limits and the horse had a normal menace response. The eyes were grossly normal.

An endoscopic examination of the upper respiratory tract was performed via the right nostril. The horse was sedated for the examination. No significant abnormalities were detected.

Comment on the horse's conformation and other specialised procedures (such as X-rays, ECG, etc) were not requested.

Within the scope of this examination I detected no abnormality that might preclude this horse from being insured for mortality and sold or syndicated as a prospective racehorse.

I have no financial or other interest in the proposed syndicate or the money raised therein.

This veterinary report has been prepared for inclusion in a Product Disclosure Statement (PDS) in relation to the offer to the public of an interest in this particular partnership and may be relied upon by a prospective investor. I give my consent to this report being included in the PDS.
