Owner - F Galluzo

TO WHOM IT MAY CONCERN

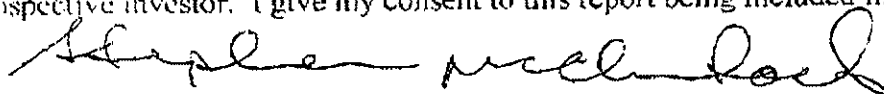

This is to certify that on the 10th January, 2010 at the request of Mr F Galluzo I examined this filly at “Whispering Pines”, Oakdale, NSW.

The horse was in good general health and condition with normal cardinal signs. There were no abnormalities on digital palpation of the joints, tendons, and musculature other than a vertical linear scar on the dorsomedial right fore canon area. There was no pain response on hoof testers. The horse was free of lameness and ataxia when examined at the trot on a lead and when trotting off after flexion tests. Auscultation of the chest was within normal limits and the horse had a normal menace response. The eyes were grossly normal.

An endoscopic examination of the upper respiratory tract was performed (scdated via both nostrils). There were no significant abnormalities detected of the upper respiratory tract.

Comment on the horse's conformation and other specialised procedures (such as X-rays, ECG, etc) were not requested.

Within the scope of this examination I detected no abnormality that might preclude this horse from being insured for mortality and sold or syndicated as a prospective racehorse. I have no financial or other interest in the proposed syndicate or the money raised therein. This veterinary report has been prepared for inclusion in a Product Disclosure Statement (PDS) in relation to the offer to the public of an interest in this particular partnership and may be relied upon by a prospective investor. I give my consent to this report being included in the PDS.
