VETERINARY REPORT

Re: My Boy Charlie x Lively Lauren (LSS S over TS RSS 1 over 3)

To whom it may concern,

This is to certify that on the 8th of September, 2015, at the request of Mr F Galuzzo, I examined the above colt at Glossodia, NSW.

The horse was in good general health and condition and had normal cardinal signs. There were no significant abnormalities on palpation of the joints, tendons and musculature. There was no evidence of lameness or ataxia on the lead and the lunge. Auscultation of the chest was within normal limits and the horse. There was a normal menace response and the eyes were grossly normal.

Within the scope of this examination I detected no abnormality that might preclude this horse from being a prospective racehorse.

I have no financial or other interest in the proposed syndicate or the money raised therein.

JENNIFER LUGTON BVSc hons N9503
