## **CERTIFICATE OF SUITABILITY FOR SYNDICATION**

**SUPREME THOROUGHBRED STUD.**

**NAME OF HORSE:** Unnamed

**SIRE:** Air Force Blue

**DAM:** Garnet Rose

**BRANDS:** **NS:** F over BS **OS:** 8 over 8

**DESCRIPTION:** Bay Thoroughbred colt

**MICROCHIP:** 985100012165287

At the request of Mr. Frank Galluzzo of Supreme Syndications, I have examined the above Colt at Robertson on the 07<sup>th</sup> October 2020. The examination was limited to a clinical examination, assessment of conformation, trot up and lameness examination.

At the time of examination, the colt was in good health and condition and free from signs of disease. No abnormalities were detected on auscultation of the heart and lungs, and the Cardinal signs were within normal limits.

His body and leg conformation are within normal limits, in fact he has, in my opinion, an athletic and scopey body. There were no signs of lameness when led at the walk.

Survey Radiographs were taken on 21<sup>st</sup> August 2020 to check for development abnormalities and bony lesions. A report is attached.

There were no lesions visible on the Radiographs taken that would in my opinion, significantly jeopardise his chances of racing.

Video Endoscope examination was performed on 21<sup>st</sup> August 2020 with the Videoscope introduced through the Right nostril. There were no visible anatomical or pathological abnormalities visible at the

PO Box 906

ABN: 29 083 169 902

time of examination. There was full and sustained abduction of both Arytenoid Cartilages, satisfying the condition of **Lane Grade 1**.

Within the limits of the examination there were no abnormalities present that would in my opinion prevent the chances of this horse withstanding the pressures of racing. In my opinion the colt is a suitable subject for syndication/sale as a racehorse.

I declare that I have no financial interest in this colt, and no financial interest in Supreme Syndications.

Yours faithfully
