

Equine Medicine & Surgery

07th October 2020

CERTIFICATE OF SUITABILITY FOR SYNDICATION

SUPREME THOROUGHBRED STUD.

NAME OF HORSE: Unnamed

SIRE: Rubick

DAM: Nautica

BRANDS: **NS:** F over BS **OS:** 5 over 8

DESCRIPTION: Bay Thoroughbred Filly

MICROCHIP: 985100012165289

At the request of Mr. Frank Galluzzo of Supreme Syndications, I have examined the above filly at Robertson on the 7th October 2020. The examination was limited to a clinical examination, assessment of conformation, trot up and lameness examination.

At the time of examination, the filly was in good health and condition and free from signs of disease. No abnormalities were detected on auscultation of the heart and lungs, and the Cardinal signs were within normal limits.

Her body and leg conformation are within normal limits, in fact she has, in my opinion, an athletic strong scopey body. There were no signs of lameness when led at the walk.

Survey Radiographs were taken on 21st August 2020 to check for development abnormalities and boney lesions. A report is attached.

There were no lesions visible on the Radiographs taken that would significantly jeopardise her chances of racing.

Video Endoscope examination was performed on 21st August with the Videoscope introduced through the Right nostril. There were no visible anatomical or pathological abnormalities visible at the time of

examination. There was full and sustained abduction of both Arytenoid Cartilages, satisfying the condition of **Lane Grade 1**.

Within the limits of the examination there were no abnormalities present that would in my opinion prevent the chances of this horse withstanding the pressures of racing. In my opinion the filly is a suitable subject for syndication/sale as a racehorse.

I declare that I have no financial interest in this filly, and no financial interest in Supreme Syndications.

Yours faithfully
